PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 1+ years of experience building scalable applications and LLM-driven automation across cloud platforms. Skilled in AWS, Azure, system design, prompt engineering, and RESTful API/tool integration, with a proven record of delivering reliable, measurable, AI-augmented software.

TECHNICAL SKILLS

- **Languages:** C++, Python, JavaScript, Java, Dart
- **Frameworks:** React, Spring Boot, Node.js, Express.js, Flutter
- **AI/Agentic:** Prompt Engineering, Multi-Step LLM Workflow Orchestration, Tool-Augmented Reasoning, RAG Fundamentals, LLM API Integration (Gemini, Ollama)
- **Databases:** MongoDB, MySQL, PostgreSQL, Firebase, SQLite
- **Cloud & DevOps:** AWS, Azure, CI/CD, Git, GitHub, Fastlane
- **Other:** REST APIs, LiveKit, OAuth2, JWT, Domain-Driven Design
- **Soft Skills:** Cross-functional Collaboration, Technical Communication, Problem Solving, Agile Teamwork

WORK EXPERIENCE

Full Stack Developer, Tata Consultancy Services (TCS) April 2025 – Present

- Architected enterprise conversational AI solutions on AWS and Azure, enabling chatbot deployments that scaled to 10,000+ concurrent users with 99.9% uptime.
- Engineered full-stack chatbot interfaces in React with real-time dynamic flows, increasing end-user engagement by 30% across 3 production client accounts.
- Developed backend microservices using Java and Spring Boot for conversation orchestration and OAuth2 authentication, cutting API response latency by 25%; collaborated with cross-functional teams to define and meet service-level agreements.
- Engineered multi-step LLM-driven workflows chaining reasoning steps with external API/tool calls to automate business logic across 3 enterprise systems, decreasing manual operational workload by 40%.

Software Development Engineer, BlueMango Labs July 2024 – December 2024

- Automated iOS and Android build distribution using Fastlane scripts, shortening release cycle duration by 50% and eliminating manual handoffs for a 10-person QA team.
- Strengthened audio and video call reliability via LiveKit SDK, decreasing connection failure rates by 35% and improving average call quality scores by one tier.
- Delivered a live streaming pipeline with under 500ms end-to-end latency using LiveKit, supporting 1,000+ concurrent viewers without degradation under peak load.

Software Development Engineer Intern, BlueMango Labs January 2024 – June 2024

- Established REST API and message broker connections to the app data layer, raising system throughput capacity to handle a 2x spike in peak-hour traffic.
- Deployed Firebase Cloud Messaging push notifications, resulting in a 20% rise in daily active users within 30 days of launch.

PROJECTS

jobctl – Local-First Job Discovery & Resume Tailoring Engine (Python, FastAPI, SQLite) GitHub

- Built a local-first job pipeline aggregating postings from Greenhouse, Lever, and Ashby APIs plus 5 job boards, deduplicating results via SQLAlchemy/SQLite.
- Designed an LLM-based reasoning agent (Gemini, with local Ollama fallback) scoring each job 0–100 against a structured resume profile, augmented with external ATS API data to surface skill and gap matches.
- Architected an APScheduler-driven autonomous discovery-and-scoring loop with JD-tailored LaTeX resume generation, orchestrating multi-step agent tasks in a human-in-the-loop workflow.

Vyra – AI Companion App (Flutter, FastAPI, Whisper) GitHub

- Built an AI companion app (Flutter, FastAPI) integrating Whisper speech recognition and neural voice synthesis for real-time conversation.
- Designed a swappable LLM backend layer decoupling conversation logic from any single model provider.

EDUCATION & CERTIFICATIONS

RGPV University – Bachelor of Engineering in Computer Science GPA: 8.7/10.0 June 2020 – May 2024

- **AWS Certified AI Practitioner**
- **Microsoft Certified Azure AI Engineer Associate** (AI-102)
