Chirag Dhunna

Full-Stack Software Engineer | LLM Applications & Cloud Architecture | Pune, India

chiragdhunna2468@gmail.com | +91 935 334 8691 | linkedin.com/in/chiragdhunna | github.com/chiragdhunna | chiragdhunna.github.io

Professional Summary

Full-Stack Software Engineer with 2+ years of experience building scalable cloud, mobile, and LLM-powered applications. Delivered enterprise conversational AI on AWS and Azure serving 10,000+ concurrent users, with strengths in microservices, REST API design, system design, prompt engineering, and agentic AI workflows.

Technical Skills

- **Languages:** Python, Java, JavaScript, Dart, C++
- **Frameworks & Libraries:** React, Spring Boot, Node.js, Express.js, FastAPI, Flutter, Riverpod, BLoC
- **AI & LLM:** Prompt Engineering, LLM Workflow Orchestration, Agentic AI, Tool Calling, RAG, Gemini API, Ollama, Whisper
- **Cloud & DevOps:** AWS, Azure, CI/CD, GitHub Actions, Docker, Fastlane, Git
- **Databases:** PostgreSQL, MySQL, MongoDB, SQLite, Firebase
- **Architecture & Practices:** Microservices, REST APIs, System Design, OAuth2, JWT, Domain-Driven Design, LiveKit, Agile

Work Experience

Tata Consultancy Services (TCS) – *Full Stack Developer* Apr 2025 – Present

- Architected an enterprise conversational AI platform on AWS and Azure, scaling chatbot deployments to 10,000+ concurrent users with 99.9% uptime.
- Built full-stack chatbot interfaces in React with real-time dynamic flows, increasing end-user engagement by 30% across 3 production client accounts.
- Developed Java and Spring Boot microservices for conversation orchestration and OAuth2 authentication, cutting API response latency by 25%; met SLAs in partnership with cross-functional teams.
- Engineered multi-step LLM workflows (prompt engineering, tool calling, external API integration) that automate business logic across 3 enterprise systems, reducing manual operational workload by 40%.

BlueMango Labs – *Software Engineer* Jan 2024 – Dec 2024

- Automated iOS and Android build distribution with Fastlane CI/CD scripts, cutting release cycle time by 50% and eliminating manual handoffs for a 10-person QA team.
- Improved audio and video call reliability with the LiveKit SDK, reducing connection failure rates by 35% and lifting average call quality scores by one tier.
- Delivered a live-streaming pipeline with under 500ms end-to-end latency on LiveKit, supporting 1,000+ concurrent viewers without degradation at peak load.
- Integrated REST APIs and a message broker with the app data layer, scaling system throughput to handle a 2x spike in peak-hour traffic.
- Shipped Firebase Cloud Messaging push notifications, driving a 20% rise in daily active users within 30 days of launch.

Projects

jobctl – Local-First Job Discovery & Resume Tailoring Engine (Python, FastAPI, SQLite) **GitHub**

- Built a local-first job pipeline aggregating postings from Greenhouse, Lever, Ashby, and Workday APIs plus 6 public job boards, deduplicating results via SQLAlchemy/SQLite.
- Designed an LLM-based reasoning agent (Gemini, with local Ollama fallback) scoring each job 0–100 against a structured resume profile and surfacing matched skills and gaps.
- Architected an APScheduler-driven discovery-and-scoring loop with research, tailoring, and outreach agents and JD-tailored LaTeX resumes, with a Streamlit dashboard tracing every agent step to a human-review queue.

Vyra – AI Companion App (Flutter, FastAPI, Whisper) **GitHub**

- Built a voice-first Flutter AI companion with a 9-emotion animated avatar and on-device ML Kit smile detection.
- Engineered a FastAPI backend streaming audio over WebSockets with voice activity detection, faster-whisper speech recognition, neural text-to-speech, and barge-in for mid-sentence interruptions.
- Designed a swappable LLM layer (Ollama, Gemini, OpenAI-compatible) decoupling conversation logic from any single provider; backed by 69 pytest tests and GitHub Actions + Fastlane CI/CD.

Education

RGPV University – Bachelor of Engineering in Computer Science · GPA: 8.7/10.0 Jun 2020 – May 2024

Certifications

AWS Certified AI Practitioner – *Amazon Web Services* **Details**

Microsoft Certified: Azure AI Engineer Associate (AI-102) – *Microsoft* **Details**
